

### Self evaluation checklist

	Often	Sometimes	Rarely
<p><b>Physics learned (and taught) in a way that is accessible and engaging for girls.</b></p> <ul style="list-style-type: none"> <li>- Gender-neutral illustrations and examples used.</li> <li>- Non-technical language and analogies used where possible/appropriate.</li> <li>- Context provided through linking topics and highlighting applications and social relevance.</li> <li>- Variety of questioning techniques used and thinking time and discussion built into activities.</li> </ul>			
<p><b>Classroom managed to promote girls' engagement in group work.</b></p> <ul style="list-style-type: none"> <li>- Roles assigned for practical work to promote engagement .</li> <li>- Differentiation between social and learning groups.</li> <li>- Students grouped for teaching and learning, not classroom control.</li> </ul>			
<p><b>Progression routes visible</b></p> <ul style="list-style-type: none"> <li>- Teachers aware of students' ability and confidence levels in physics.</li> <li>- Information, advice &amp; guidance (IAG) provided reflects the range of routes into physics</li> </ul>			
<p><b>Relevant careers promoted</b></p> <ul style="list-style-type: none"> <li>- Careers that interest students have been identified and promoted.</li> <li>- Links to careers made within class.</li> </ul>			
<p><b>Workforce: girls (and boys) access good physics teaching</b></p> <ul style="list-style-type: none"> <li>- Physics staff are supported in development</li> <li>- Specialist teaching is accessed pre- and post-O-level to give continuity</li> <li>- Workforce is effectively deployed to teach physics.</li> </ul>			
<p><b>Ethos of "physics is for everyone": positive perception of the subject in school</b></p> <ul style="list-style-type: none"> <li>- Positive school culture identified.</li> <li>- There is support for physics at senior level in school, e.g. flexibility with timetable .</li> <li>- Staff and students are proactive in discussing physics options.</li> </ul>
