### Instructional Methods Reflecting 5 Leading Strategies

- 1. Read the Handout on Models, Strategies, Methods. First read to understand the difference between the concepts (Models-Strategies-Methods). Then read to understand the difference between the Models and how Strategies fit in the variety of Models.**
- 2. Below is the list of methods that can be used while implementing one of the 5 strategies.**
- 3. From the given list of Instructional Methods select appropriate methods, activities and place them into Strategy Circles where they belong. Insert at least 6 methods in each circle:**

Lecture, discussion, inquiry, presentation, role play, demonstration, homework, group discussion, synectics, mind mapping, problem solving, case study, textbook exercise, concept formation, webquest, debates, educational games, simulations, video, programmed texts, dioramas, jigsaw, guided practice, fieldtrips, drill and practice, didactic questioning, experiments, mock trials, contests, internet search, e-mail communication, mapping, essays, graphic organizers, reflective journals, brainstorming, “spelling bee”, learning logs, storytelling, “show and tell”, independent research, visualization, mnemonics, mock shows, guest speaker, tournaments, think-pair-share, cubing, recitations, direct reading thinking activity, Socratic seminar, peer tutoring, auto tutorial, cooperative learning, discovery, drama, explicit teaching, mastery learning, learning centers, library center, meta-cognition, projects, review and practice, script writing, self-instructional module, study guide, symposium, term paper, textbook, festivals, .

## 5 Instructional Strategies aligned with the Instructional Methods and Activities
