

SUMMARY OF SYNTAX USED IN TUTORIALS

Tutorial 4: Basic Text Editing

Bold Text	'''	Enclose with 3 single quotes	This is '''bold''' text	This is bold text
Italics	"	Enclose with 2 single quotes	This is "italics"	This is <i>italics</i>
Indents	:	Colon	This is no indent :This is one indent ::This is two indents	This has no indent This is one indent This is two indents
Headings:	=	Equal signs	=Level 1= ==Level 2== ===Level 3===	Level 1 Level 2 Level 3
Bulleted List	*	<i>Keep bullet hard against margin</i> One asterisk Use two asterisks to nest	* one * two ** two point one * three	<input type="checkbox"/> One <input type="checkbox"/> Two <input type="radio"/> Two point one <input type="checkbox"/> Three
Numbered List	#	Hash sign (<i>do not leave an open line</i>)	#One #Two ##Two point one #Three	1. One 2. Two 1. Two point one 3. Three

Tutorial 5: New Pages and Links:

New Page /Internal Link	[[]]	<i>Page names are case-sensitive</i> Double Square brackets	[[New Page]]	New Page
Internal link with alternative name displayed	[[xx yy]]	Pipe (Shift backslash)	[[Online_manual The eXe User Manual]]	The eXe User Manual
External link:	URL	http://www.exelearning.org		
Named External Link	[URL space name]	Square brackets enclosing URL space then name to appear	[http://www.exelearning.org eXe website]	eXe website
Numbered external link	[URL]			

Tip: You can use your User page or Sandbox as a kind of holding space for the link to a new page; later you add this link into your project to point to this page. Remember if there is no link from an existing page to your new page, you may have difficulty finding it again.

Tutorial 6: Images and Media:

Insert Image:	<code>[[Image:Name]]</code>	Picture name is case sensitive Double square brackets, enclosing Image colon Name of picture	<code>[[Image:Picture_Name.jpg]]</code>	If image uploaded: picture If not uploaded: red link
<i>Insert image with attributes</i>			<code>[[Image:Picture_Name.jpg type location size caption]]</code>	
Type:	Thumb or		<code>[[Image:Picture_Name.jpg thumb location size caption]]</code>	Default thumbnail is 180 pixels wide.
	Frame		<code>[[Image:Picture_Name.jpg frame location size caption]]</code>	
Location:	Specify right left or centre here	<i>Example:</i>	<code>[[Image:Picture_Name.jpg thumb right size caption]]</code>	Default is left
Size	Display size Width or Width x height	<i>Xpix</i>	<code>[[Image:Picture_Name.jpg frame right 300px caption]]</code>	
Caption:	Description of picture		<code>[[Image:Heart_Graphic.jpg right 300px Graphic showing details of the structure of the heart]]</code>	

Tips If you have problems with your images floating over other elements in your page, try adding this syntax after your image:
<br style="clear:both;" />

Sources of Copyright free pictures:

[Flickr Creative Commons](#) Search Flickr for images covered by Creative Commons licenses.

[Wikimedia Commons](#) -- repository for freely licensed photographs, diagrams, animations, music, spoken text, video clips, etc

[Openphoto](#)

Tutorial 9: Pedagogical Wiki Templates

Insert Template	<code>{{Template_name}}</code>	Curly brackets	<code>{{Objectives}}</code>	 Objectives
				<code>{{{1}}}</code>

Tip: If you see something that you might like to use in WikiEducator, click on the top **edit** link then look below the **Save page** buttons for a list of the templates used in that page. Clicking on a Template link will take you to the templates page.
