**IT Expert/ Web Developer, www.addischamber.com
Addis Ababa Chamber of Commerce and SA, AA, Ethiopia**

[April 2007 – Nov 2009]

As a primary responsibility I had undertaken responsibilities on creating, updating, and maintaining websites for the Chamber and member business organizations, using PHP, CSS, HTML, JavaScript, XML and MySQL . Coordinate with other departments and designers for major site changes. Maintain internal tools for managing site structure, new data. Assist with design efforts for site pages, content archival, photo galleries, video features, and third-party gadgets. Provide technical support for usability issues and critical site problems, as needed.

Subsequently I had duties of

- Assisting in evaluation and recommendation activities for new Application Software and Database relevant to AACCSA effectiveness in achieving its business objectives;
- Training of end users on new and currently used software and technical procedures and business processes.
- Analyzing business process, defining requirements and developing application and database specification in consultation with team members.
- Working with end users on priority setting and solutions of day-to-day problems
- Providing regular status reports to supervisor.
- Participating in all software development meetings in website and in house systems.
- Providing direct assistance to end users, both for Head office and branch office, of required software applications.
- Maintaining and creating user access and identifications for security purposes.
- Organizing work priorities and time management effectively.
- Reforming such other related tasks as required.

Software Engineer, www.eahead.net
eAhead, AA, Ethiopia
