Cavity battens were installed over the top of each stud to provide a drainage and ventilation to the outside of the house.

Cavity closer at the bottom

Corner soakers are put over the exterior corner of the weatherboards to protect the ends from damage and make them quicker to install.

Window tape installed

Holding a stores rod

ceMakers[®]
w how. Can do.

Installing the wrap

Corner box and scribes installed

When cutting the weatherboards, PPE we had to use was muffs, glasses and a dust mask. The saw had a vacuum attached to it to collect most of the dust.
