

Project

The local neighbourhood centre is planning a community development project. You have decided on the project you want to undertake by using the videos above as inspiration. Write up a checklist of what you need to take into account in the initial stages of the planning process, for example who are you going to contact, how will you do this, what do you need to take into account before doing this, when will you undertake the start of the project.

- Through discussion with peers, family and friends, identify 2 issues that could become a community development project. What would be the next step in the process of putting one of these projects into action?
- The capacity building approach focuses on the notion that community development works with the individual and not for the individual. What does this mean for you?
- Identify community structures and resources *available* to groups to maximise outcomes for groups
- Any intervention or strategy put into place needs to take into account the culture and sensitivities of the individuals participating in the project.
- What other resources could be used to get the message across?
