Installing Ubuntu in NZ

The computer needs to be 500mhz or faster and have 256mb Ram

Plug all cables necessary into the computer
Turn on the computer and insert the Ubuntu CD
Turn off the computer and restart with the CD inserted

On the screen choose English language and Install Ubuntu

Wait patiently

Choose English (again) location Auckland Keyboard USA

Guided Use Entire Disk (this gets rid of nasties on the hard drive)

Choose a name for your machine i.e laptop or computer
(All our school computers are named school)

Password eg ju8cu6BT (mix of 8 numbers/letters)
(All our school computers have the same password)

Click install

Wait patiently

Click restart now and remove disk

Done

It will restart on its own

Type in user name and password

You are now ready for Ubuntu tweaks
